

**GENERAL DESCRIPTION**

The Opulent Collection PVC Wall Panels are constructed through PVC extrusions under a controlled environment overseen by management and quality control staff.

Due to the PVC construction, and the construction of the panels, The Opulent Collection PVC is rigid and strong.

The Opulent Collection PVC Wall Panels offer additional benefits such as being considerably easier to install, hygienic, fully waterproof material construction, and class 1 fire rating for commercial use.

These wall panels are for internal use only.

MATERIAL

- Recyclable Virgin PVC for consistency of quality
- Calcium Carbonate (CaCO₃)
- Contains stabilisers, brighteners, and strengthening materials
- Gloss UV resistant lacquer surface finish
- None of these materials are classified as dangerous
- No toxic effect
- Non-hazardous

SIZE/WEIGHT

- 2400mm x 1000mm x 4mm
- Minimum 8.0kg/sqm, 19.2kg per panel
- 20.7kg per sheet including packaging
- Panels can be easily cut to size on site

STORAGE AND HANDLING

- Store flat and face to face
- No specific handling requirements
- Beware of heavy weight, 2 person required to handle/lift
- Protect edges and decorative surface from damage during handling

COLOURS

8 Colours available

FIRE RATING

STORMs Opulent Collection PVC hold a Class 1A fire rating which can be sent in full upon request to STORM. Holding this fire rating the Opulent Collection PVC Panels are ideal for many domestic and commercial installations. No specific fire-fighting instructions required.

THERMAL PROPERTIES

STORMs Opulent Collection PVC Panels can handle temperatures/heat of up to 60°C before any discolouration or warping of the PVC incurs.

SCALE FORMATION

- Low susceptibility to hard water
- Standard scale remover can be used on any scale build-up

CHEMICAL RESISTANCE

Opulent Collection PVC is resistant to caustics, mineral oil and food such as milk and coffee etc.

IMPACT RESISTANCE

Opulent Collection PVC Panels have been tested and have met EN13245-1:2004.

ACCESSORIES

We recommend the use of Aluminium Internal corners, external corners, starter trims and division bars with The Opulent Collection PVC Panels.

PREPARATIONS

Opulent Collection PVC Panels are very easy to cut using a fine-bladed saw. While cutting, you must be aware that sharp edges may be encountered which should be smoothed off. When preparing the PVC Panels, gloves and protective eye-wear should be worn.

When cutting with a jigsaw or circular saw, cut with decorative side downwards, and when cutting with a handsaw, cut with decorative face upwards.

Panels should not be stored outside or left in direct sunlight as the UV rays will damage the surface and will affect the appearance.

Install in conjunction with STORMGRIP and the stated guidelines on the PDS.

CLEANING

The Opulent Collection PVC Panels should only be cleaned with hard surface cleaner or any other non-abrasive cleaners (any cleaners/detergents which contain bleach should not be used). Scouring products should not be used. Acetone, halogenated carbon hydrates, esters, ketones, ethers and alcohols should not be used on PVC. Steam mops are not suitable to use on the PVC panels.
