Frequently asked questions

What is artificial grass?

STORM artificial grass is a 25, 35 and 45mm pile two-tone mix of conifer green grass blades with a green and brown curled root system. This makes it the ideal all-year-round grass.

What is artificial grass used for?

Artificial grass is a replacement for live grass and is perfect for people that don't have the time to maintain a green garden all year round. It also provides a maintenance-free grassy area for where grass won't grow.

What is the best thing about artificial grass?

Artificial grass provides the busy family with a maintenance-free garden that maintains its fresh look all year round.

Why should end users use STORM artificial grass?

STORM artificial grass has the ultimate flexibility for quantity as it is cut to size to meet customer requirements.

Who are the type of customers that commonly use artificial grass?

Landscapers, building developers, housebuilders and builder's merchants.
